3717-1-03.2 Food: protection from contamination after receiving.

(D)Food storage containers - identified with common name of food. Working containers holding food or food ingredients that are removed from their original packages for use in a food service operation or retail food establishment, such as cooking oils, flour, herbs, potato flakes, salt, spices, and sugar shall be identified with the common name of the food except that containers holding food that can be readily and unmistakably recognized such as dry pasta need not be identified.

A plastic container with a white powdery substance in it was observed in the dry good storage room without identification of contents. A plastic container with sauce in it was observed in the walk in cooler without identification of contents on it. Keeping working containers of food identified helps prevent misuse of products. THE CONTAINER IN THE DRY GOODS ROOM WAS LABELED POWDERED SUGAR TO CORRECT AND THE SAUCE WAS REMOVED TO CORRECT.

3717-1-06.2 Physical facilities: numbers and capacities.

(I)Lighting - intensity

The light intensity shall be:

1. At least ten foot candles (one hundred eight lux) at a distance of thirty inches (seventy-five centimeters) above the floor, in walk-in refrigeration units and dry food storage areas and in other areas and rooms during periods of cleaning;
2. At least twenty foot candles (two hundred fifteen lux) at a distance of thirty inches (seventy-five centimeters) above the floor, in inside equipment such as reach-in and under-counter refrigerators; and
3. At least fifty foot candles (five hundred forty lux) at a surface where a food employee is working with food, utensils or equipment such as knives, slicers, grinders, or saws where employee safety is a factor.

3 lights were not working in the walk in freezer at the time of inspection with less than 3 foot candles being produced in parts of the unit. Please repair the light to ensure that at least 10 foot candles of light are produced in the unit.
